Above it is the typical series of the Kiowa shales the lower part of which consists of black shales containing but few fossils, followed by the coarser yellowish to pinkish shales and shaly limestones containing abundant fossils. The thickness of the Kiowa is 136 feet, being nearly as great as that in any of the sections studied in southern Kansas. As far as the writer is aware, the only previous references to the occurrence of the Comanche series on this hill are brief statements by Professors St. John and Cragin. In St. John s notes on the Geology of Southwestern Kansas an apparently three references to the Cretaceous of this locality, though they are very meagre. In one place it is simply stated that In the high lands east of the...
