Water Quality Vital Signs Monitoring Protocol for the Pacific Island Network: Volume 1-Version 1.0

By Tahzay Jones, Kimber Deverse, Gordon Dicus

Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Water resources in the Pacific Island Network (PACN) support rich and diverse ecosystems and aquatic communities that include corals reefs, anchialine pools communities (endemic to Hawaii), and freshwater stream communities. These water resources span a range of conditions from pristine to highly impaired water bodies. Both point and non-point sources impact the waters of many of our network parks at various locations to varying degrees. Aquatic resource protection is required by all the governments of the PACN, and water quality is widely used as an indicator of aquatic resource condition by regulators and ecologists. The United States Clean Water Act (CWA) of 1977 requires States and Territories to promulgate legally enforceable water quality standards (WQS) and lists of waters not currently meeting or expected to meet the standards. This protocol should provide the parks with some of the summary information necessary to determine their compliance with the applicable WQS in addition to providing correlative environmental data to ecologists. The water quality vital sign is closely linked with the benthic marine community, marine fish, groundwater, and freshwater animal communities...
