Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from An Introduction to Zoology This book has been written for the use of students taking the introductory course in Zoology in Universities and Colleges. It has been prepared especially for the zoological part of the work in General Biology at the University of Michigan, and is expected to supplement the one lecture and four hours of laboratory work per week during the first half year. No textbook now on the market covers the field of the introductory course in Zoology as it is given at several of the leading Universities. These courses deal with invertebrate types only, being followed by a course on vertebrate types during the second half year. Only a few animals belonging to the more important phyla, as viewed from an evolutionary standpoint, are considered. They are, however, intensively studied in an endeavor to teach the fundamental principles of Zoology in a way that is not possible when a superficial examination of types from all the phyla is made. Furthermore, morphology is not specially emphasized, but is coordinated with physiology, ecology, and behavior, and serves to illustrate by a comparative study the probable course of evolution. The animals are not treated as inert objects for dissection, but as living organisms whose activities are of fundamental importance. No arguments, I believe, are necessary to justify this method of procedure, since the so-called the course, developed with the problems of organic evolution in mind, and dealing with dynamic as well as static phenomena, is recognized by most teachers at the present time as the best method of introducing young students to Zoology. About the Publisher Forgotten Books publishes hundreds of thousands of rare and...
