Brand New Book ***** Print on Demand *****.Excerpt from Aeroplane Design, and a Simple Explanation of Inherent Stability It seems well to make clear why these two? writers should be taken seriously by trained and experienced engineers, especially in these days when aeronautical science is in its infancy, and when much harm has been done both to the development of aeroplanes and to the good repute of genuine aeroplane designers by people who pose as aeronautical experts on the strength of being able to turn out strings of incomprehensible calculations resulting from empirical formulae based on debatable figures acquired from inconclusive experiments carried out by persons of doubtful reliability on instruments of problematic accuracy. Certain British manufacturers of sufficient independence of character have proceeded along their own lines and have produced aeroplanes which remain unbeaten, power for power, by any in the world on the score of sheer efficiency. These machines - notably Avro two-seater tractor biplanes, Bristol single seater biplane Scouts, Martinsyde Scouts, and Vicker s pusher gun-carrier biplanes - have done more than anything else to assure to the Royal Flying Corps during 1915 that ascendancy in the air over German aircraft which has been such a notable feature of the war.
